

Computrek VirtualVault Data Backup Solutions

Computrek Information Management Group (CIMG) focuses on service, support and building long-term partnerships. Safeguard your irreplaceable data with Computrek's VirtualVault Online Data Backup Solutions. Using state of the art software, we provide you with a secure backup service that ensures that you can quickly get back up and running should you ever experience any kind of data disaster.

Managed Online Backup Services

Your data is one of your most valuable commodities. Customer records, invoices, documents and contact information are all essential components of your business and a data disaster can be crippling.

With our VirtualVault Data Backup Solutions, we will backup your desktops, laptops, and servers using our state of the art software. It is always best to back up your corporate data offsite. With our VirtualVault Managed Backup Solutions, we look after your data and scheduled backups so you don't have to. Don't wait to find out your 'cost of downtime'!

Why Backup Online?

- ◆ Online backups provide you with the most reliable and secure way to protect your corporate data
- ◆ When you back up your data to a server offsite, you ensure that your data will be safe even in the event of a physical disaster, theft, or loss
- ◆ With online backups, we manage the procedures in which the backups are created, eliminating time consuming processes and costly user errors
- ◆ Users can restore previous versions of files easily and without hassle
- ◆ With our online backup systems, your data is securely encrypted and compressed before it is transferred to your offsite backup server, allowing for optimized bandwidth and maximizing storage usage

Service Highlights

- ◆ Our browser-based interface is intuitive and user-friendly
- ◆ You can back up workstations, servers, laptops, documents, e-mails, databases, and more
- ◆ Powerful compression and 448 bit encryption ensures that your data is secure and optimized for minimal space requirements before it even leaves your machine
- ◆ Supported operating systems include: Windows, Linux, Mac OSX and FreeBSD
- ◆ Scheduling options include continuous backup protection and multiple full data backups
- ◆ Point in time restore allows you to simply point and click to retrieve a previous version of a file
- ◆ Intelligent backup systems retrieve only your modified data, reducing the required bandwidth and storage space

Introductory Rates:

Backup	Cost	Introductory Offer
1 Server	\$499.00/ year	1st year—\$299.00
